

Energy Efficiency and Sustainability:

A journey of 15 years

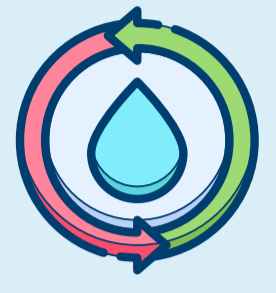

2009

Certifications and seals:

- Certification of the UNE-EN ISO 14.001 standard and EMAS regulation.

2010-2018

Water savings:

- Installation of single-handle mixer taps.
- Replacement of baths with showers in apartments.
- Installation of dual-flush toilets in apartments.
- Installation of 3,300 water saving devices for taps.
- Gardening upgrades: installation of new sprinkler heads, meters, irrigation programmers and underground irrigation systems.

Energy savings:

- Installation of led lights.
- Installation of motion detectors.
- Optimisation of work equipment performance.
- Installation of pvc thermofusion pipes.
- Removal of unnecessary light fixtures.
- Installation of a+ rated appliances in apartments.
- Installation of a manual awning system to prevent overheating in apartments.

Waste:

- Installation of recycling points for customer waste segregation

2019

Energy savings:

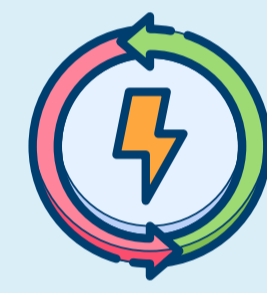

- Replacement of propane boilers with heat pumps for DHW production in PSIII.
- Installation of solar control glass in PSIV.

2021

Water savings:

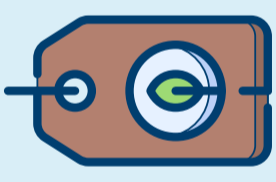

- Commencement of pipe renovation to improve water management on PSIV.

Energy savings:

- Closure of refrigerators and installation of air curtains in the supermarket on PSIV.

2022

Certifications and seals:

- Certification of the UNE-EN ISO 50.001 standard.

Energy savings:

- Renewal of the air conditioning system in the PSV supermarket.

Responsible consumption:

- Replacement of conventional paper with paper certified with an environmental seal.

2023

Energy savings:

- Replacement of propane boilers with heat pumps for DHW production in PSIV.
- Installation of a photovoltaic plant on PSV.

Environmental awareness:

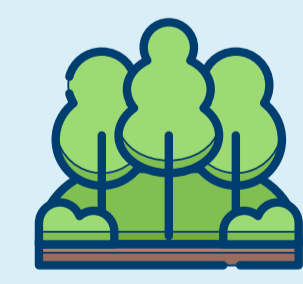

- Launch of the environment section on the corporate website.

2024

Energy savings:

- Installation of a domotic control system in the heat pump room for DHW on PSIV.
- Launch of a new washing strategy and replacement of dryers with more efficient machinery.

Environmental awareness:

- Launch of the environmental awareness campaign targeting customers and employees.

Responsible consumption:

- Elimination of plastic bottles through the installation of water dispensers for employees.
- Purchase of amenities with a lower carbon footprint in their production.
